SUBSTANCE ABUSE

A. General:

The PFD intends to ensure a safe and productive environment. Accordingly, this guideline prohibits being under the influence, use, possession, transportation, promotion, or sale of illegal drugs or drug paraphernalia, or otherwise legal but illicitly used substance, by anyone while on organization business or premises. This includes prescribed or over-the-counter drugs not being used for their intended or authorized purpose and abusive use of alcohol.

A. Testing:

Testing by urinalysis may be required of a member at any time. Immediate medical attention will be requested and testing may occur when factors such as physical appearance, behavior, or other circumstances give good faith reason to question whether the member may be impaired and whether substance abuse may be a factor. A member to be tested will be requested to agree to the test procedure and to the restricted release of test results. Failure to conform will result in immediate suspension pending an investigation.

If a member's test result is confirmed to be positive, it will be given consideration by the Command Staff in determining any discipline for the event or circumstances which led to the test. If continued in membership, the member will be required to cooperate with Department approved medical evaluation and prescribed treatment. The member may also be required to participate in follow-up activities that may include further evaluation, treatment and/or counseling. Additionally, the member will be subject to unannounced substance abuse testing during the twelve-month period following the positive test.

B. Requirements:

A member who fails to follow the requirements of this guideline or whose suspension is upheld will be subject to disciplinary action up to and including termination of membership.

Additionally, as part of any contract for services by the organization, the contractor may be required to certify in writing that it will take whatever steps it deems necessary to insure that involvement in substance abuse on the part of the contractor's employees does not create the presence of substance abuse related problems to the organization. This section of the guideline is to be implemented at the discretion of the organization.
